**DETAILED ACTION**

1. The enclosed detailed action is in response to the Amendment submitted on February 28, 2007.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8, 11-16 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Sekiguchi (USPN: 5,901,911).

Regarding claims 1-2, 7-8, 11, 15-16 and 18, Sekiguchi discloses sending out a signal to select one of several modes for a PMC (programmable memory cell; the memory elements are configurable as volatile memory cells or nonvolatile memory cells and thus they are programmable memory cells) memory component (Abstract); operating the memory component in accordance with the specific mode selected by the signal, wherein depending on the specific mode selected, a PMC memory cell of the PMC memory component is brought into states of different storage permanence by correspondingly selecting a height of a current intensity of a programming pulse applied to the PMC memory cell (Abstract).

Regarding claims 3 and 12, Sekiguchi discloses a soft writing mode (volatile memory operation mode).

Regarding claims 4-5 and 13-14, Sekiguchi discloses a hard writing mode (non-volatile memory operation mode).

Regarding claim 6, Sekiguchi discloses writing data into the memory component, a current intensity, a duration of a programming pulse is adapted and or a number of programming pulses (Abstract).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sekiguchi (USPN: 5,901,911).

Regarding claims 9-10, Sekiguchi does not disclose sending the select signal on the same data lines as the data or using mode selection bits that are followed by bits carrying the data to be stored. However, these concepts are well known in the art wherein control/address and data signals are multiplexed on the same signal lines. This method reduces the overall number of signals required to transmit information, thereby reducing delays in the system due to the natural characteristics of a signal line such as impedance. Hence, it would have been obvious to one of

ordinary skill in the art to incorporate such functionality in the system taught by Sekiguchi for the desirable purpose of improved performance afforded by delay reduction.

***Response to Arguments***

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
